

How to interpret the SSSR

The purpose of a Student and School Summary Report (SSSR) is to provide feedback on how students and cohorts of students within schools performed in NAPLAN tests. It is intended to be used by schools to inform teaching and learning programs, and is not for distribution to parents and carers.

The SSSR enables school staff to identify areas of strength and areas for development for students, linked to the Australian Curriculum.

The NAPLAN scale was reset in 2023. Results can be compared over time from 2023 onwards, but not to years prior to 2023.

From 2023, student achievement is measured using proficiency standards. More information on proficiency standards is available on the NAP website at www.nap.edu.au.

SSSRs are generated using the online assessment platform. The SSSR provides information at school, class and individual student level.

Columns in tables can be sorted by clicking on table headings.

Home School Item Report Class Summary Report Class Test Report Student Reports

About the Student and School Summary Report

The student and school summary report (SSSR) enables schools to see how their students, classes and year groups performed in NAPLAN tests. The SSSR is composed of six school-facing reports, intended for use by schools: school item report; class summary report; class test report; student report; student results table; student results graph

The online tests for numeracy, reading and conventions of language were delivered in a staged adaptive design, where students were presented with different pathways through the test depending on their performance in the test to that point. This allows students to engage with questions that are targeted to their level of achievement. As a result, not all students will have seen the same questions in these tests.

Although all students have not seen the same questions, the test design ensures all results can be placed accurately on the NAPLAN scale. In fact, the targeting of test questions to student performance allows this to be done more precisely than with a single fixed test.

Exemplar items are available through the SSSR. Exemplars are indicative of the skill assessed and the relative difficulty of the original items. Some exemplars contain Third Party Materials that are licensed for educational use in connection with NAPLAN. Third Party Materials and their terms of use are identified online via the following link - <https://nap.edu.au/resources>.

Student reports

The screenshot shows the 'Student Reports' for Green Tree School. It displays a table of student results for the domain 'Grammar and Punctuation'. The table includes columns for Student ID, Local Student ID, Student Name, Year level, Class Group, Domain, Subdomain, Attempts, Correct, Incorrect, Not Attempted, Proficiency level, and Participation code. The table shows results for four students, with the first student having a proficiency level of 'Strong'.

The table includes columns for Student ID, Item ID, Item description, Attempts, Correct, % Correct, Incorrect, Not Attempted, Subdomain, Exemplar Item Code, and Student Name. The table shows results for four students, with the first student having a correct percentage of 100%.

Student results table

Student results graph

School item report

This report indicates the number of students particular items were allocated to, the number of correct answers, the number of incorrect answers and the number of times where a student was allocated an item but did not attempt to answer.

Item difficulty is shown as a scale score with the associated proficiency level for each item. The subdomain, a link to the Australian Curriculum (v8.4) content code and descriptor are also displayed for each item.

How to interpret the

SSSR

Class summary report

A class summary report shows one box plot for each domain.

A box plot is also called a “box-and-whisker diagram”.

A whisker extends from the lowest to the highest score.

A box extends from the 25th to the 75th percentile, so that it contains the middle 50% of scores. A box is divided by a line to indicate the median score.

The class summary report displays the same 4 proficiency levels that are shown on NAPLAN individual student reports. Elements of the box plot may not be displayed if they fall outside of the graph area.

About the Student and School Summary Report

The student and school summary report (SSSR) enables schools to see how their students, classes and year groups performed in NAPLAN tests. The SSSR is composed of six school-facing reports, intended for use by schools: school item report; class summary report; class test report; student report; student results table; student results graph.

The online tests for numeracy, reading and conventions of language were delivered in a staged adaptive design, where students were presented with different pathways through the test depending on their performance in the test to that point. This allows students to engage with questions that are targeted to their level of achievement. As a result, not all students will have seen the same questions in these tests.

Although all students have not seen the same questions, the test design ensures all results can be placed accurately on the NAPLAN scale. In fact, the targeting of test questions to student performance allows this to be done more precisely than with a single fixed test.

Exemplar items are available through the SSSR. Exemplars are indicative of the skill assessed and the relative difficulty of the original items. Some exemplars contain Third Party Materials that are licensed for educational use in connection with NAPLAN. Third Party Materials and their terms of use are identified online via the following link - <https://nap.edu.au/resources>.

n = 26

This shows the number of students in this class who participated in the test, including students with a refusal participation status.

The highlighted orange proficiency level shows where the median score is located and is a quick visual cue to the user. Half of the students in the class group score below the median, and half score above.

All Year 3 students and some students in Years 5, 7 and 9 complete an alternative format (paper) writing test. Their results are imported into the platform and are displayed in this report.

How to interpret the

SSSR

Class test report

A class test report shows the range of student performance compared with the difficulty of items. This report can be generated for each class or for all classes within a year level.

The person–item map in this graph provides visual information about the difficulty of items relative to the performance of students. Exemplar items from the school item report are provided for context.

The class test report displays the distribution of student scale scores across proficiency levels, and the difficulty of items for a given class group on a vertical axis. The class test report displays the same 4 proficiency levels that are shown on NAPLAN individual student reports.

Writing

The item difficulty that displays in this field is the average score for all writing prompts for this year level.

Proficiency levels

Students' initials are placed within their relevant proficiency level.

Student's initials

Click on a student's initials to see detailed results for this student (in the "Student results" table).

Item exemplar

The item exemplars show skills assessed and are grouped by item difficulty. These are not the set of items that the student saw.

For example, the student is at the Exceeding level. Click the items beside the Exceeding proficiency level to see exemplars for items that are targeted to that student cohort ability.

Student achievement

Student achievement is displayed and ordered on this side of the report against the NAPLAN proficiency levels. Students who completed an alternative format (paper) writing test are included in the class test report.

Items and item difficulty

Item exemplars are displayed on this side of the report. The items are ordered by relative difficulty. The most difficult items are at the top and the least difficult items are at the bottom. Not all students sit all the items.

How to interpret the

SSSR

A student report shows the summary results for all students by domain in a year level within a school. More detailed results for each student, including all item descriptors, can be accessed by clicking on the student's record.

The report shows results for each student, including the proficiency level achieved and the test pathway taken.

Reading and numeracy

All students at each year level start with questions that test the same range of complexity (testlet A). Depending on the student's test performance in testlet A, the second testlet includes questions with content that may be less complex (B) or more complex (D). Low-achieving students may proceed from A to C.

At the end of the second testlet, the student is directed to the third testlet, again depending on their test performance. The final testlet also includes content of increasing complexity: C vs E vs F. Students who proceeded from A to C will be branched to B.

Proficiency levels

The 4 proficiency levels cover the full range of student achievement in the tests at each year level. NAPLAN reading and numeracy use a tailored test design. The tests automatically adapt to a student's test performance and ask questions that match the student's achievement level.

NAPLAN results for each student are based on both the number and difficulty of the questions the student answered correctly. A student who completes a more complex set of questions is more likely to achieve a higher score. A student who answers the same number of questions correctly, but follows a less complex pathway, will achieve a lower score.

How to interpret the

SSSR

A student report shows the summary results for all students by domain in a year level within a school. More detailed results for each student, including all items attempted by the student, can be accessed by clicking on the student's record.

The report shows results for each student, including the proficiency level achieved and the test pathway taken.

Conventions of language tailored test design

Conventions of language

All students at each year level start with the same set of audio spelling questions (testlet SA) before branching to less complex questions (testlet SB) or more complex questions (testlet SD). Students are then branched to proofreading questions PB (less complex) or PD (more complex), depending on their performance in previous questions.

When students have completed all spelling items, all students at each year level start with grammar and punctuation questions that test the same range of complexity (testlet A). Depending on the student's performance in testlet A, the second testlet includes questions with content that may be less complex (B) or more complex (D). Low-achieving students may proceed from A to C. At the end of the second grammar and punctuation testlet, the student is directed to the third testlet, again depending on their performance. The final testlet also includes content of increasing complexity: C vs E vs F. Students who proceeded from A to C will be branched to B.

Proficiency levels

The 4 proficiency levels cover the full range of student achievement in the tests at each year level. NAPLAN conventions of language uses a tailored test design. The tests automatically adapt to a student's test performance and ask questions that match the student's achievement level.

NAPLAN results for each student are based on both the number and difficulty of the questions the student answered correctly. A student who completes a more complex set of questions is more likely to achieve a higher score. A student who answers the same number of questions correctly, but follows a less complex pathway, will achieve a lower score.

How to interpret the

SSSR

HBW1 3-007		HBW1 3-007	3	BT3	Grammar and Punctuation	A B E	27	18	9	0	Strong	Participated

Nodes, pathways and testlets

There are 6 nodes for reading, grammar and punctuation and numeracy: A, B, C, D, E, F. Spelling has 5 nodes: SA, SB, SD, PB, PD. Nodes are reached by branching. The SSSR pathway is defined by the nodes; for example, ABE (reading, grammar and punctuation and numeracy) or SA, SB, PB (spelling).

Each node contains testlets: A1, A2, A3, etc. (for reading, grammar and punctuation and numeracy) and SA1, SA2, etc. (spelling). Testlets are allocated rotationally within a test session. Each testlet contains different questions/items.

A student results table shows a student's results for a single test.

If the item difficulty exceeds the scale score for the student in that domain, and the response is correct, the response is marked as an exception. Conversely, if the item difficulty is lower than the student-achieved score

on the NAPLAN scale, the incorrect response is flagged as an exception.

Question Order	Item ID	Testlet	Item difficulty	Proficiency level	Subdomain	Descriptor	Student Marked Response
1	x00195494	A2NC	430	Needs additional support	Number and Algebra	Compares the magnitude of numbers in the thousands	✓
2	x00191508	A2NC	472	Developing	Number and Algebra	Solves a multi-step multiplicative problem involving basic facts	✓
3	x00195751	A2NC	492	Developing	Number and Algebra	Solves an additive problem involving difference	✓
4	x00191215	A2NC	545	Strong	Number and Algebra	Converts between fractions and percentages	✗
5	x00023057	A2NC	563	Strong	Number and Algebra	Multiplies and divides decimals by powers of 10	✗

Exception filter

Select the exception filter to see the items that have been answered correctly when the student would have been expected to answer the item incorrectly, or vice versa.

If the scale score for the item exceeds the scale score for the student in that domain, and the response is correct, the response is marked as an exception. Conversely, if the item is lower than the student-achieved score on the NAPLAN scale, the incorrect response is also flagged as an exception.

Student Results Table

Domain: Writing View Script

Criteria	Description	Student Score	Score Description
Audience	The writer's capacity to orient, engage and affect the reader.	4	Narrative text supports reader understanding and begins to engage the reader.
Text Structure	The organisation of narrative features including orientation, complication and resolution into an appropriate and effective text structure.	3	Includes beginning, complication and resolution; may include multiple complications and resolutions.
Ideas	The creation, selection and crafting of ideas for a narrative.	4	Ideas are substantial and elaborated, and contribute effectively to a central storyline; story contains a suggestion of an underlying theme.
Character and Setting	Character: The portrayal and development of character. Setting: The development of a sense of place, time and atmosphere.	4	Details are selected to create distinct characters; maintains a sense of setting throughout by selecting details to create a sense of place and atmosphere.
Vocabulary	The range and precision of contextually appropriate language choices.	4	Sustained & consistent use of words & word groups that enhance the meaning or mood (may be some inappropriate or inaccurate word choices).
Cohesion	The control of multiple threads and relationships over the whole text, achieved through the use of referring words, substitutions, word associations and text connectives.	4	A range of cohesive devices is used correctly and deliberately to enhance reading an extended, highly cohesive piece of writing, showing continuity of ideas and tightly linked sections of text.

The student's scores for each of 10 criteria are displayed in the student results table.
