INDUSTRY AND ENTERPRISE

Written examination

Friday 15 November 2013

Reading time: 3.00 pm to 3.15 pm (15 minutes) Writing time: 3.15 pm to 5.15 pm (2 hours)

QUESTION AND ANSWER BOOK

Structure of book

Number of questions	Number of questions to be answered	Number of marks
7	7	70

- Students are permitted to bring into the examination room: pens, pencils, highlighters, erasers, sharpeners and rulers.
- Students are NOT permitted to bring into the examination room: blank sheets of paper and/or white out liquid/tape.
- No calculator is allowed in this examination.

Materials supplied

- Question and answer book of 20 pages.
- Additional space is available at the end of the book if you need extra paper to complete an answer.

Instructions

- Write your **student number** in the space provided above on this page.
- All written responses must be in English.

Students are NOT permitted to bring mobile phones and/or any other unauthorised electronic devices into the examination room.

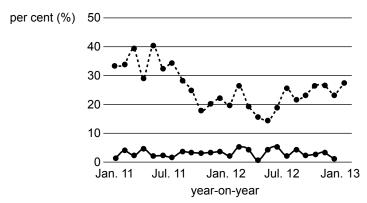

Instructions

Answer all questions in the spaces provided.

You are encouraged to draw on your structured workplace learning and wider industry knowledge when answering questions in this paper.

Question 1 (10 marks)

Growth in online sales vs. retail sales

···· online index — ABS retail sales (excluding takeaway food)

Source: National Australia Bank Limited, 'NAB Online Retail Sales Index, Indepth report', January 2013

retail sales – goods bought from retail stores (bricks and mortar sales) **online sales** – goods bought from domestic and international online retailers

Describe the trend in the above graph.	2 marks

Outline the impact that this trend could have on one stakeholder in the Austra industry.	2

Question 7 (17 marks)

¹pervasive – common

²exacerbated – made worse

SmartCap

The Cooperative Research Centre for Mining (CRCMining) has developed a baseball cap headwear technology to measure and manage drowsiness in real time, in order to overcome the significant problem of driver fatigue in the coal mining industry.

Known as the SmartCap Operator Fatigue Management System, the baseball cap technology solves a problem identified in the mining industry and is expected to be of much wider benefit to other workplaces where fatigue is a major concern.

. .

Each baseball cap contains brain monitoring sensors concealed in the cap lining and uses an operator's brain wave information to calculate a measure of drowsiness. This calculation is wirelessly communicated to a display in-cab, or to any Bluetooth enabled device to alert the driver or operator of fatigue.

Such fatigue is most pervasive¹ in long-haul transport and heavy industries such as construction and mining, where it is responsible for hundreds of fatalities and injuries each year as well as millions of dollars in lost productivity. In the absence of appropriate fatigue management strategies and technologies, this problem is exacerbated² by the combination of an ageing workforce and increasing demands on operators to achieve production quota.

'Mining companies are committed to safety, and this commitment has translated into a successful collaboration that will benefit the global mining industry, and the wider community,' project manager Dr Daniel Bongers said. 'This project has been good for industry, and good for Australia ...'

With the look and feel of a typical baseball cap, the SmartCap has overcome operator acceptance problems experienced at mining sites where camera or response based technologies have been implemented in the past.
