If you want to get down to business, you can learn about business terminology, financial processes, document creation, customers and services. This course will open up opportunities for further study and work in private and public organisations throughout the world.

If you want to be your own boss, it's time to learn what it takes to run your own business. Learn about money, marketing, public relations, product research and development, financial and physical resources and sales. Kick-start your journey into the world of small business.

If cars and trucks get you revved up, you can learn how to maintain and repair a range of vehicles. With further training you could go on to become a mechanic, an engineer or technician in a range of industries including motorsport, the military or mining.

If you're passionate about improving the lives of others in the community, you can develop skills in early childhood education and care, and community services work. Learn how to support community development, implement educational programs, understand legal and ethical requirements, and develop knowledge in social welfare and the human services industry.

If you follow fashion and want to get ahead of the game, you can uncover the trends and technologies shaping the industry. You will develop skills for the design and production of clothing and fabric.

If you want to let your imagination run free, you can develop a broad range of skills in creative design and production. Depending on your interests you can learn 2D digital animation, visual design for broadcast, lighting, animation, digital effects, web design, editing or set construction.

If electrical systems ignite your passion, power up with skills across a range of sectors, including electrical, electrotechnology and mechanical engineering. Develop safety practices and other workplace skills that will prepare you for working in the industry.

Whether you want to do an engineering apprenticeship or follow a professional engineering career, this course can give you valuable hands-on experience in fabrication, general engineering, machining, producing basic engineering sketches and drawings, handling engineering materials and performing computations.

Whether you dance for fun, fitness or a future career, this course has the versatility to develop your dance techniques, prepare you to work in the industry and develop a range of complementary skills like preparing for auditions.

If you've got the music in you, get behind the scenes and see what it takes to be successful in an industry that is always changing with new technology and trends. You can study Music Performance or Sound Production, learning about the industry, recording and the music business.

If you want to grow or conserve nature, you can develop skills in farming, animal handling, animal health and feeding, milking, growing plants, restoring natural areas, pest control, agricultural technology, sustainability and much more.

Whether you see yourself behind the scenes preparing fantastic food and drinks or front-of-house creating memorable customer experiences, you can develop the cookery and service skills that will prepare you for a career in hospitality. You can learn to prepare food, cook, process payments, and follow hygiene and health and safety procedures.

If you want to give your subject selections a makeover, you can learn what it takes to stand out from the crowd with an introduction to the hair and beauty industry. You will learn to provide advice to clients, perform a variety of hair and beauty treatments and services, apply makeup, sell hair and beauty products, handle money and keep records.

If you see yourself working in a hospital, health clinic, medical facility or lab, you can begin to develop a range of entry level skills in patient care and supporting health services. Learn about medical terminology, infection prevention and control, patient transport, body systems and health support.

If you see yourself being involved in the design, construction, and maintenance of the built environment, such as roads, railways, buildings, bridges, tunnels, and dams, this qualification will give you the entry level skills and knowledge to enter the world of civil construction.

If you love foreign languages and culture or you are thinking about living and working overseas, you can develop your foreign language skills. In your chosen language, you can learn how to listen, speak and write in social, casual and professional situations.

If you value a safe, clean water supply, quality sanitation facilities and dry and comfortable shelter, this qualification will prepare you with the skills and knowledge to enter into an apprenticeship in one of the various sectors of the plumbing industry.

If you want to see a career in science under the microscope, you can get technical training in laboratory operations. Carry out laboratory procedures and develop technical skills and scientific knowledge for entry-level positions including laboratory assistant and instrument operator.

If you are sports minded or love physical activities, you can get a new set of skills in sport and outdoor recreation. Develop skills and knowledge in a range of different sports. Learn how to plan and conduct activities, events, warm-ups, cool downs, fitness programs, recreation, coaching and risk assessment.

If you have ever wanted to build computers and networks, now you can. You can also learn to troubleshoot and repair faulty hardware, diagnose malware, maintain software and operating systems, and protect and secure ICT systems.

If you want to change the world, Integrated Technologies might give you the spark. Almost every product and service you use depends on electronic technologies. This is creating new and growing career opportunities in robotics, advanced manufacturing, 3D printing and more.

Learn how to manage and optimise Cisco® systems, and develop the skills and knowledge to undertake the exams for internationally recognised Cisco® qualifications. You will also develop advanced problem solving and analytical skills appropriate for studies in engineering, mathematics and science.
